Vertical integration

Our vertically integrated company allows us to do all manufacturing processes internally. We have warpers, looms, finishing plant, fabric and yarn dyeing plant, digital printing, special finishing processes and tailoring services.

We have more than 4.000 fabrics in permanent stock.

We manufacture fabrics for home decoration, such as curtains and sheers, upholstery, bed and table linen. Also technical fabrics, especially for contract projects: FR flame retardant, easy to clean fabrics, stain resistant, with protection against electromagnetic radiation, antibacterial, sound absorbent, for outdoors, dimouts and blackouts.

**We are represented in the main international markets
and in the world's most important trade fairs**

Commitments

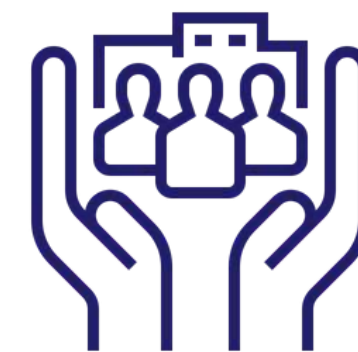

Quality

To exceed our customers' expectations by manufacturing quality, stylish and innovative products that meet their needs.

Environment

A vocation for sustainable manufacturing: energy, raw materials and production processes are governed by the desire to protect the planet.

Human resources & legal

Commitment to compliance with all legal requirements. Total team wellbeing and integrity; constant training and active participation.

Eco Friendly production

ISO 14001 Certification since 2008

Our commitment with quality includes always protecting the environment

We produce 99% of the electricity and thermal energy we use

All water used is cleaned by our biological reactor wastewater treatment plant

We use and support recycled raw materials

We certify the quality of our products

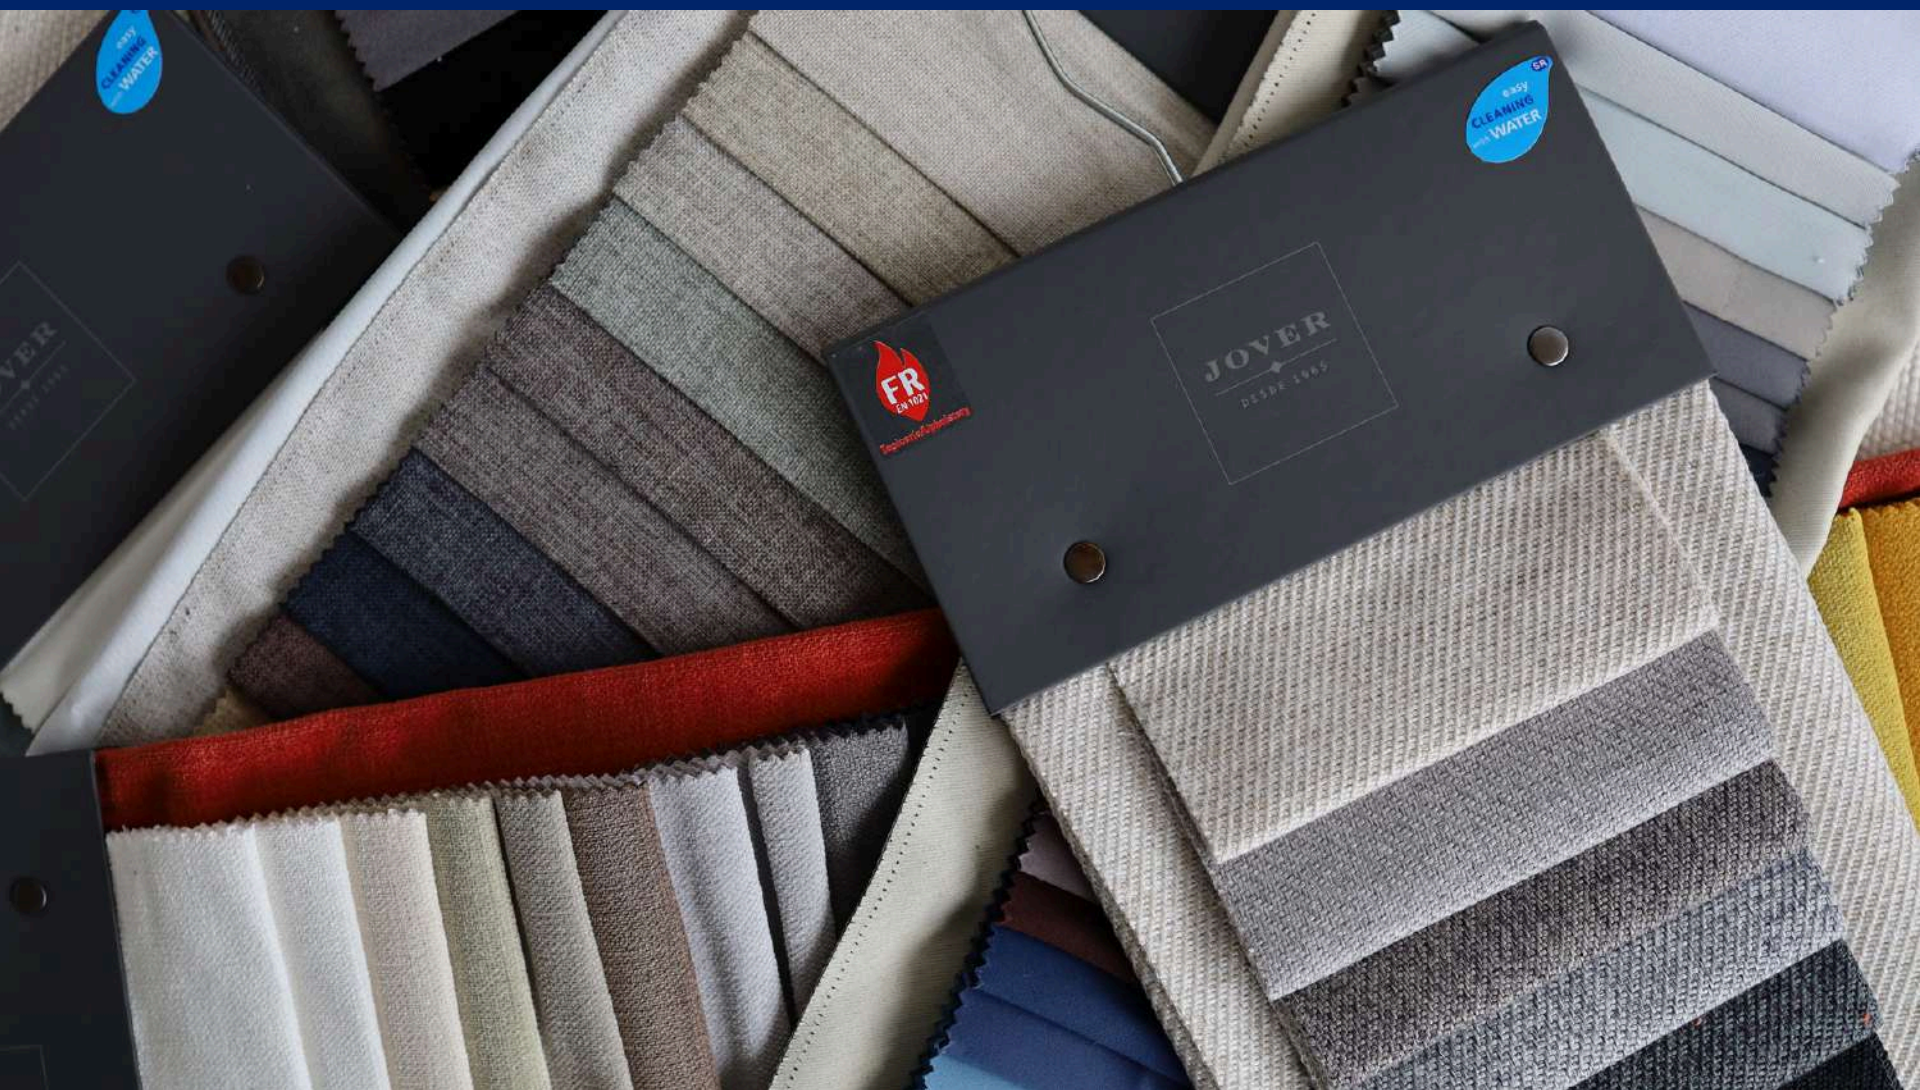

Quality control systems specifically designed for each manufacturing process and we have our own internal laboratories in order to ensure our quality standards:

- **Textile Lab** for testing physical features: Martindale's resistance, pilling, washing shrinkage lightfastness, yarn resistance and many more quality tests.
- **Fire Lab** for our fabrics to pass the different International Standards: C1, M1, IMO, EN, BS...
- **Dying Lab** for new colors and developments.
- **Confection Lab** to check every made to measure item.

We develop fabrics to improve people's daily lives

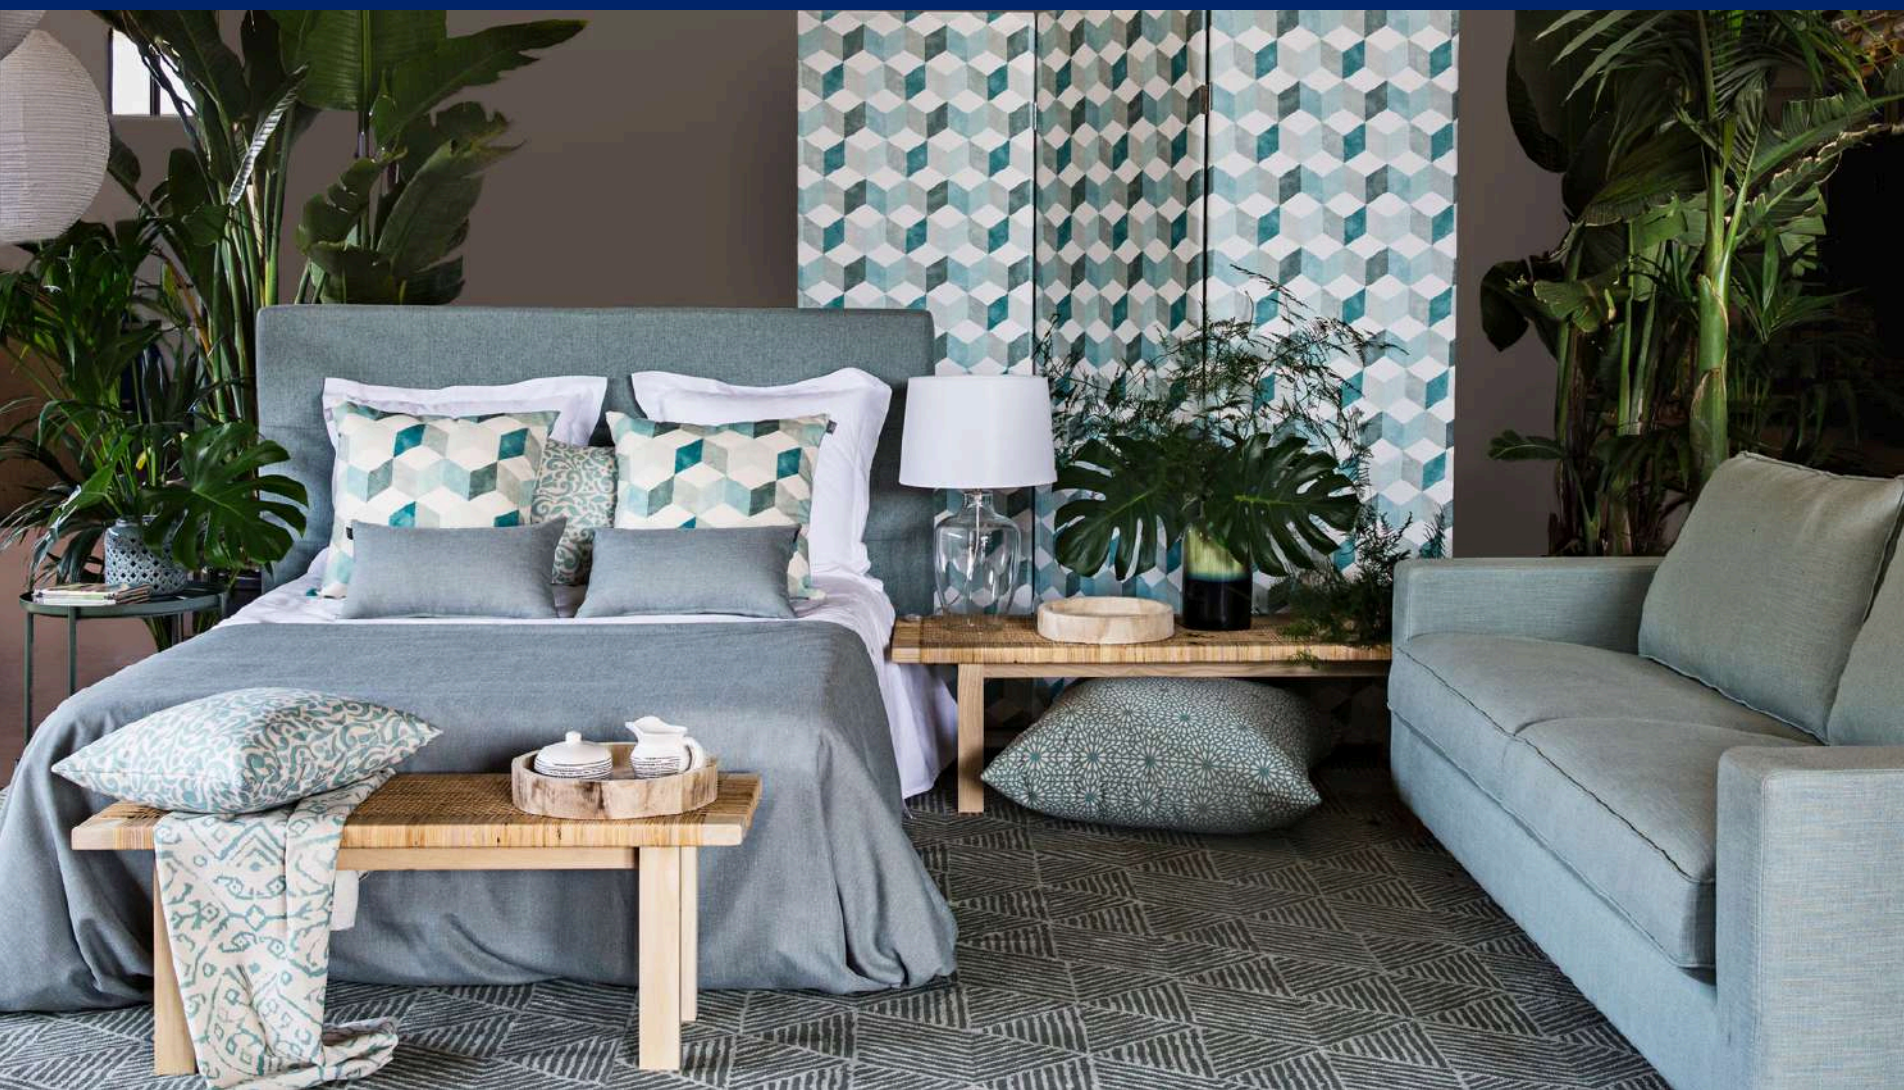

The word innovation is in our DNA and we always try to develop textiles that contribute to people's health and to the environment

- 100% recycled textiles.
- FR textiles with C1, M1, IMO Certifications by Aitex*.
- Smart fabrics with protection to high and low frequency electromagnetic radiation.
- Easy cleaning with water.
- Antibacterial and Antimicrobial fabrics with virus inhibition effect.
- Sound absorbing fabrics.

Specialists in fabrics for Contract projects

We manufacture technical fabrics to be used in public places and collectivities such as hotels and restaurants

Our FR fabric collection includes plains, jacquards, prints, blackouts, dimouts and many more

Our well equipped facilities allow us to be flexible, provide quick solutions and adapt to the needs of our customers, also offering the services of custom digital printing and made to measure

Custom digital printing on textiles

We can print the design of your choice on our fabrics, whether it is your own design that you send us or one from our collection

We can digitally print on various base fabrics such as sheers, blackout and dimouts; many of the available bases are flame retardant

We have a made to measure service

We offer the possibility of purchasing the finished product ready to use.

Quality service and all accessories included:

- Curtains and sheers of all types
- Blinds, panels and roller blinds
- Headboards, bedspreads, duvet covers, bed covers
- Tablecloths and table linen
- Curtain rails

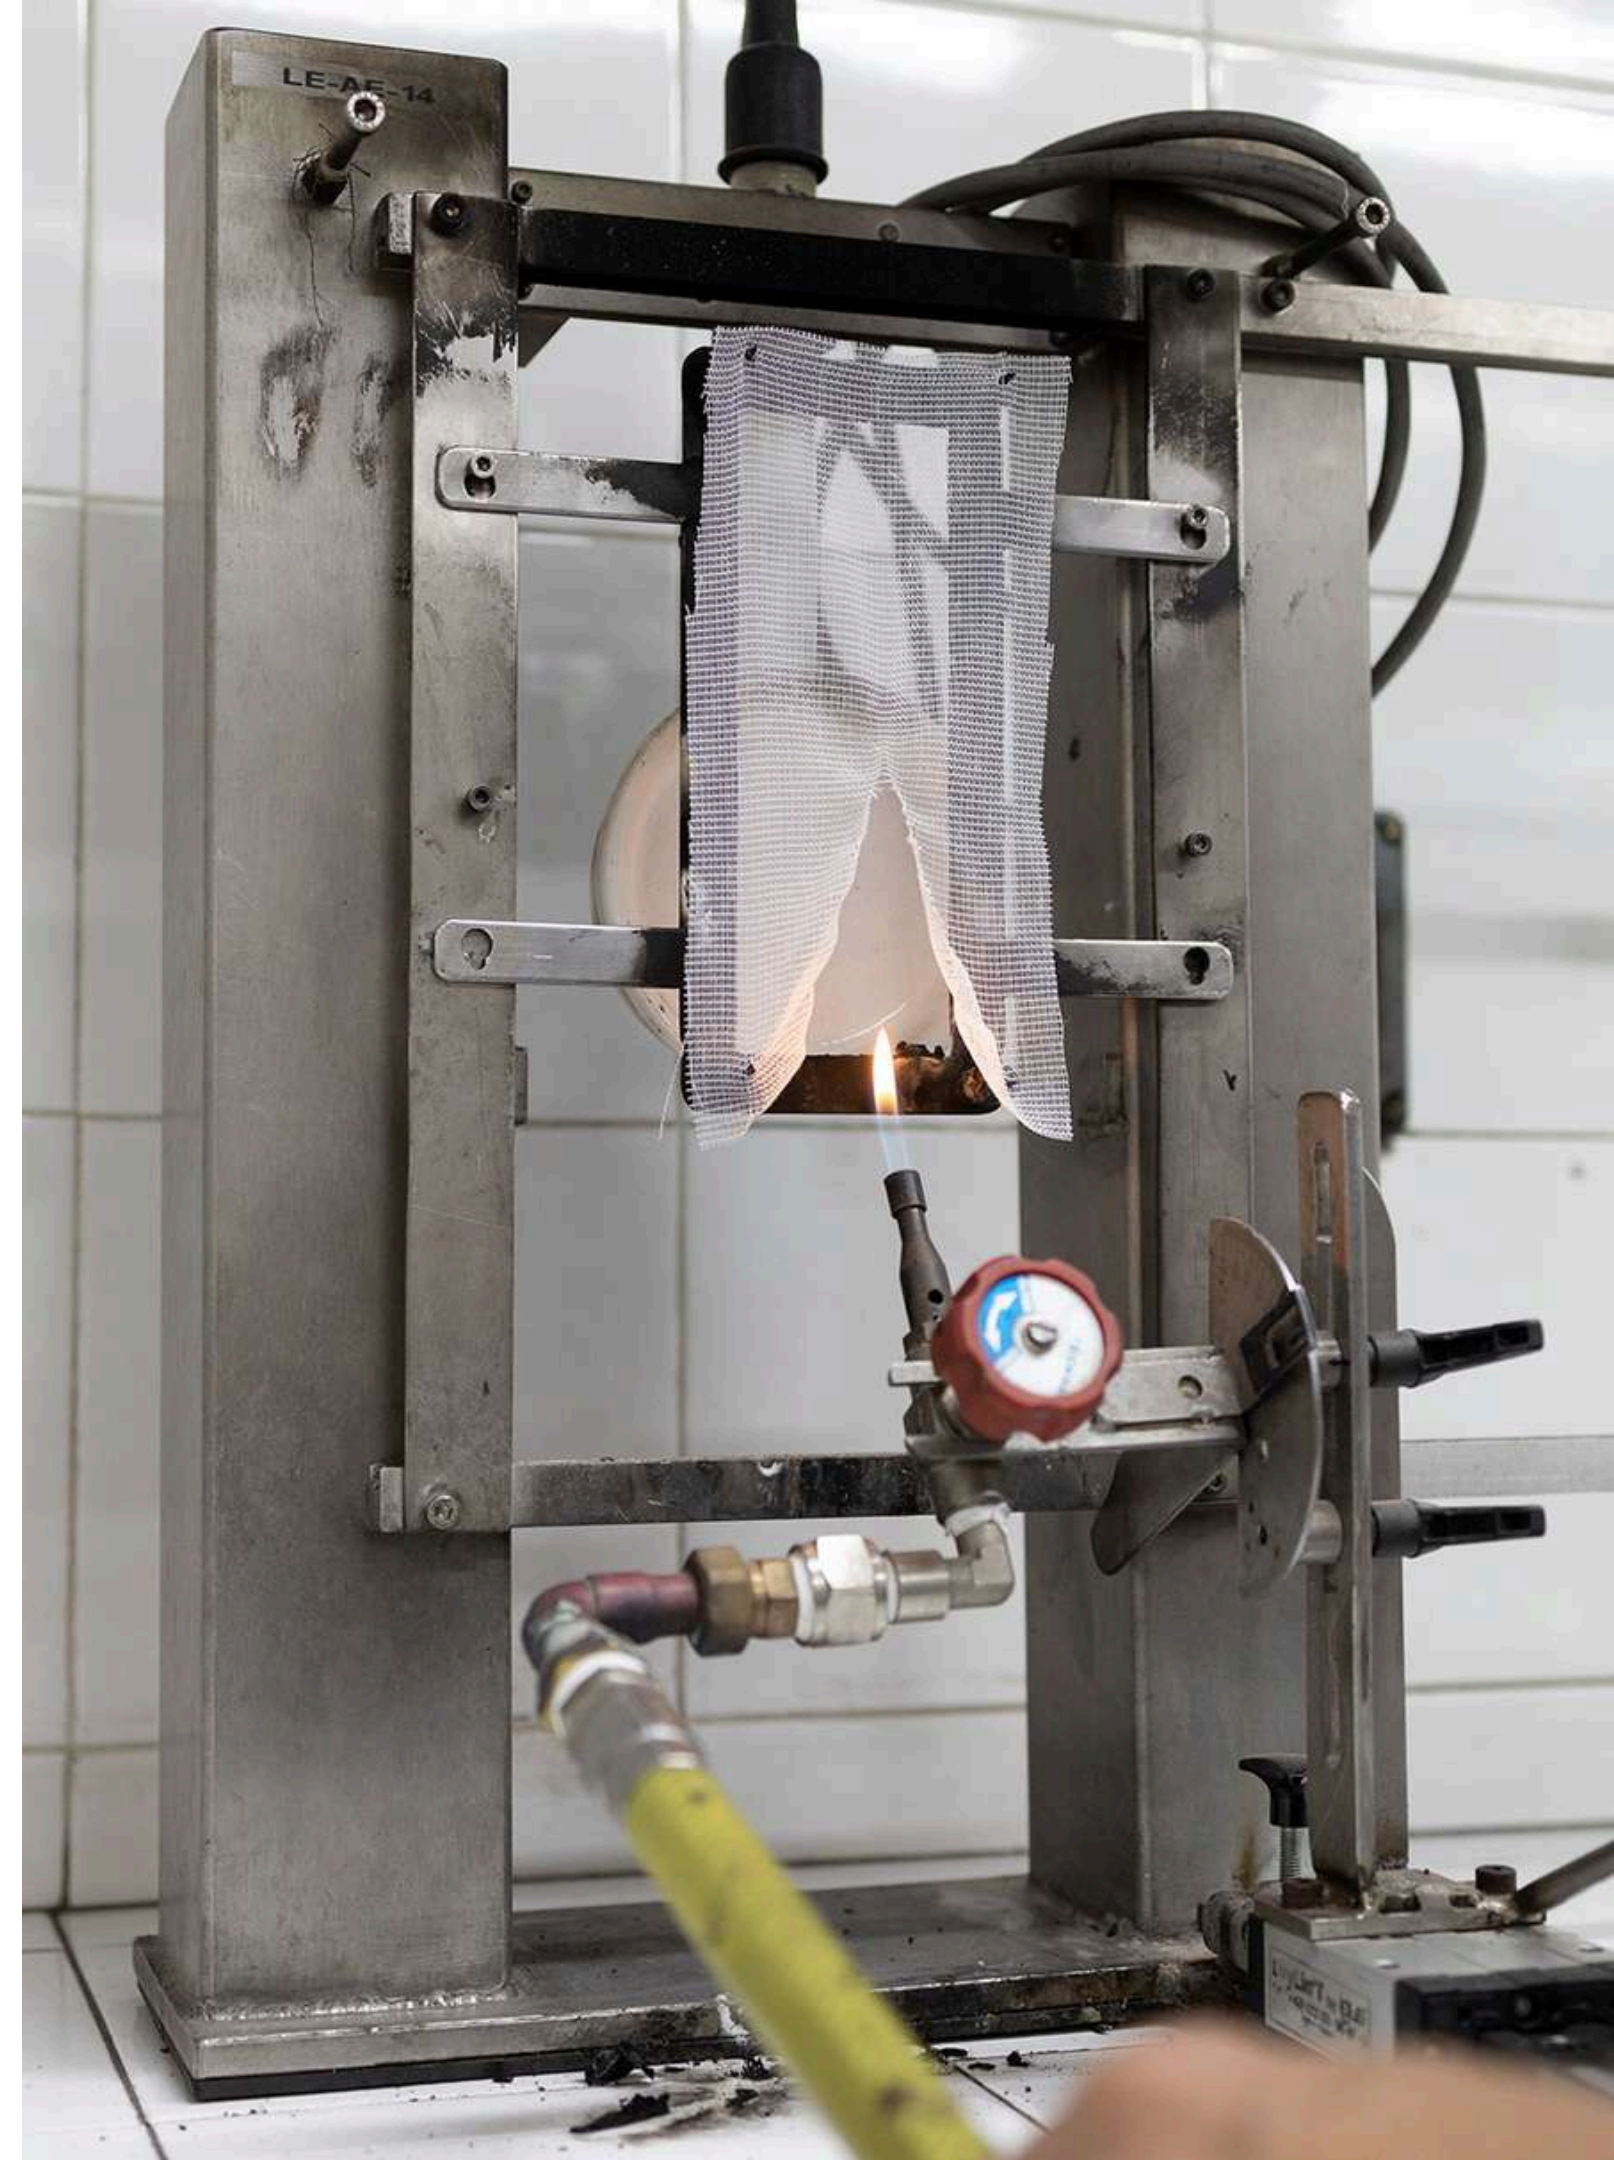

FR Flame retardant fabrics

We develop and manufacture in our facilities in Spain a collection of FR flame retardant fabrics. Our flame retardant fabrics maintain their properties over time, are highly resistant and are certified to comply with the main international standards: EU Europe, M France, UNI Italy, BS UK, NFPA USA and IMO for nautical projects.

Current legal regulations require fabrics to comply with strict fire safety standards. Our fabrics are certified by Aitex according to the standards:

- EN 13773 EUROPE
- NF P92-507 M1 FRANCE
- BS 5867-2 TYPE B BRITISH
- UNI 9177 ITALIAN
- NFPA 701 AMERICAN
- IMO FTP 2010 PART 7 NAUTICAL

in&out*Outdoor collection by Jover*

Outdoor fabrics

We manufacture fabrics suitable for upholstery, cushions, mats, curtains or any other decorative element, highly resistant and suitable for outdoor use. They have a high light fastness, with protection against ultraviolet rays; they are resistant to salt and chlorinated water; and they are very easy to clean thanks to their stain resistant finish.

easy
CLEANING
with **WATER** **SR**

SR fabrics: easy cleaning with just water

Our fabrics with SR technology allow you to remove any kind of stain using just water. This treatment is permanent and continues to work wash after wash; it makes the fabric softer and improves its breathability; it is antistatic and hydrophilic; it does not contain fluorocarbons, respecting our planet.

Recycled fabrics

We promote the circular economy by using recycled raw materials, certified by GRS Global Recycled Standard. We mainly use polyester fibre obtained from recycled PET bottles and cotton fibre obtained from recycled fabrics and used clothing. All raw materials used are recyclable.

StopRadiation
Fabrics by Jover

Fabrics that protect against electromagnetic radiation

Smart fabrics with protection against high and low frequency electromagnetic radiation. They contribute to making homes, workplaces, hotels, hospitals or any other public space healthier. We have certifications that accredit their anti radiation, flame retardant and antibacterial properties.

SILENCE[®]

SoundProof fabrics by Jover

Sound absorbing fabrics

Collection of sound absorbing fabrics, with flame retardant properties, designed to improve acoustics in public spaces. From light and transparent fabrics for sheers, to velvets and dark fabrics for curtains and upholstery. Certified in accordance with the UNE-ISO 10534-2:2002 standard and the EN13773 standard.

Antibacterial fabrics

A line of technical fabrics with antibacterial and antimicrobial properties with an inhibitory effect against encapsulated viruses or viruses with viral envelopes, such as coronaviruses, in order to reduce their diffusion speed. These fabrics are able to reduce the number of virus particles that come into contact with the textile surface.

Our brands

Armando Ferre

JOVER

1965

Jover

Since 1965 producing in Spain quality fabrics for home textile decoration and contract projects. Currently the fabric catalogue has more than 4.000 references in permanent stock: plain, textures, prints, jacquards, hundreds of different designs with different technical characteristics. The fabrics for curtains, sheers, upholstery, cushions and bed linen stand out.

KA International

An extensive collection of high quality fabrics and textiles for the home and contract projects that launches new products every season. It also has a magnificent collection of upholstered furniture, wallpaper, lighting and modern decorative pieces that combine perfectly with the fabrics in the catalogue. Always available to customers through a network of shops with the best professionals and an online shop, with products made to measure according to their needs.

The logo for Maison Decor, featuring the words "maison" and "decor" stacked vertically inside a white outline of a house shape. The background of the entire image is a display of various fabric samples, including cushions and a rack of fabric bolts, with a patterned wallpaper in the background.

maison
decor

A smaller version of the Maison Decor logo, consisting of the words "maison" and "decor" inside a house-shaped outline.

maison
decor

Maison Decor

Collection of fabrics for upholstering furniture, making curtains and sheers, cushions, duvet covers, headboards and any other decorative use. The main characteristics of the premium fabrics for home decoration are design, easy maintenance and sustainable production, respecting the environment as much as possible. The fabrics are arranged in different and colourful shades, very easy to find in the collection showcase, making prints a very important part of the collection.

Armando Ferre

Armando Ferre is a brand with a long history and experience in the manufacture of high quality fabrics for home decoration and upholstery. The Armando Ferre collection stands out for giving prominence to the latest trends, combining Jacquard fabrics with digital printing and dyeing to achieve a contrasting effect in the same weft yarn. These fabrics are manufactured for furniture upholstery, curtains, sheers or any other decorative element.

Armando Ferre
by Jm

A close-up photograph of a person's hand holding a piece of fabric with a complex, multi-colored plaid pattern. The fabric features shades of red, orange, grey, and white. The hand is positioned on the left side of the frame, with fingers gently gripping the fabric. The background is a larger, slightly out-of-focus version of the same fabric pattern.
